# Property Office

The professional online property back-office

## Organise unlimited properties the easy way

Property Office is a web-based software application designed exclusively for Real Estate & Holiday Rentals Agents and has all the tools necessary for the easy, effective and efficient management of all back-office detail.

Designed to satisfy the most demanding user, Property Office, among its many outstanding and highly user-friendly features, allows the Agent to list, in the clearest and most attractive way possible, an

unlimited number of properties, including photographs, comprehensive property descriptions, location details and all other relevant information through a dedicated, password-protected control panel. All entries listed

are stored on a database devoted exclusively to the Agent and are multi-indexed under an unlimited number of categories such as Location, Area, Country, Type and sub-Type of property to facilitate quick, easy and well targeted searches.

Property Office is hosted on dedicated Internet servers and is expandable from the basic package to include several **Optional Modules \***.

## Property Office consists of three essential elements

1.) - Software 1.450 Euros

Programmed using the latest Microsoft Asp.Net technology and running Microsoft SQL Server 2000 as database, Property Office provides the user with an easy and simple way to integrate valuable data into an existing web site.

N.B. Rentals Management Add-On available for 725 Euros

2.) - Updates/Support 9% per annum

Property Office is updated regularly to incorporate the latest features. And – for your peace of mind – our software includes a comprehensive integrated support system, with our technicians on hand with immediate responses to your support requests.

3.) - Hosting 600 Euros per annum

Our dedicated internet servers provide outstanding performance and reliability. Our hosting package includes the latest Windows 2003 Server, Net Framework 1.1, one SQL Server database, 20 e-mail accounts, automatic daily backups of all data and detailed visitor statistics.
